

CFSL DIGITAL FORENSIC EXAMINATION REPORT

CENTRAL FORENSIC SCIENCE LABORATORY (CFSL)
DIRECTORATE OF FORENSIC SCIENCE SERVICES - GOVT. OF INDIA
DIGITAL FORENSICS DIVISION

Forensic Report Number: CFSL/BLR/DF-2026/0419

Date of Dispatch: 20-August-2026

Reference Crime No: CCPS/CR/2026/0891

Forwarded By: Station House Officer, Cyber Crime Police Station, Bengaluru

Item Received for Examination:

1. Parcel 'A': One (1) SanDisk Extreme Pro 1TB NVMe Solid State Drive

(Serial No: 2408X-7719B)

2. Parcel 'B': One (1) BitLocker Encrypted Memory Dump Image File (MD5:

e4d909c290d0fb1ca068ffaddf22cbd0)

Forensic Laboratory Examination & Methodology:

- Physical Examination: Seals found intact matching the specimen impression of CCPS seal.

- Write-Blocked Bit-Stream Imaging: Bit-by-bit physical forensic image created using Tableau Forensic PCIe Bridge T7u.

- Cryptographic Hashes:

* Original Drive SHA-256:

7f83b1657ff1fc53b92dc18148a1d65dfc2d4b1fa3d677284add200126d9069

* Forensic Image SHA-256:

7f83b1657ff1fc53b92dc18148a1d65dfc2d4b1fa3d677284add200126d9069 (100% Verification Match)

Forensic Findings & Extraction Analysis:

1. File Carving revealed a deleted Python script titled

`token\_bypass\_inject.py` located in unallocated clusters.

2. The script contained embedded credentials and hardcoded webhook endpoints directing funds to offshore crypto wallet `0x71C...49A1`.

3. Event log analysis of `Security.evtx` confirmed deliberate execution of `mimikatz` utility on 08-Aug-2026 at 02:14:22 UTC.

4. Browser history and Tor browser artifacts confirmed communication with dark web relay nodes between 02-Aug-2026 and 12-Aug-2026.

Conclusion & Expert Opinion:

The physical evidence exhibits definitive proof of unauthorized cryptographic key exfiltration, malware staging, and credential manipulation. The digital artifacts directly correspond to suspect user profile 'verma_s'.

Examined By:

Dr. Aruna Sundaram, Ph.D.

Senior Scientific Officer (Cyber Forensics & AI), CFSL Bengaluru
